

# Renew Biological Fertilizer with Trichoderma for onion white rot control.

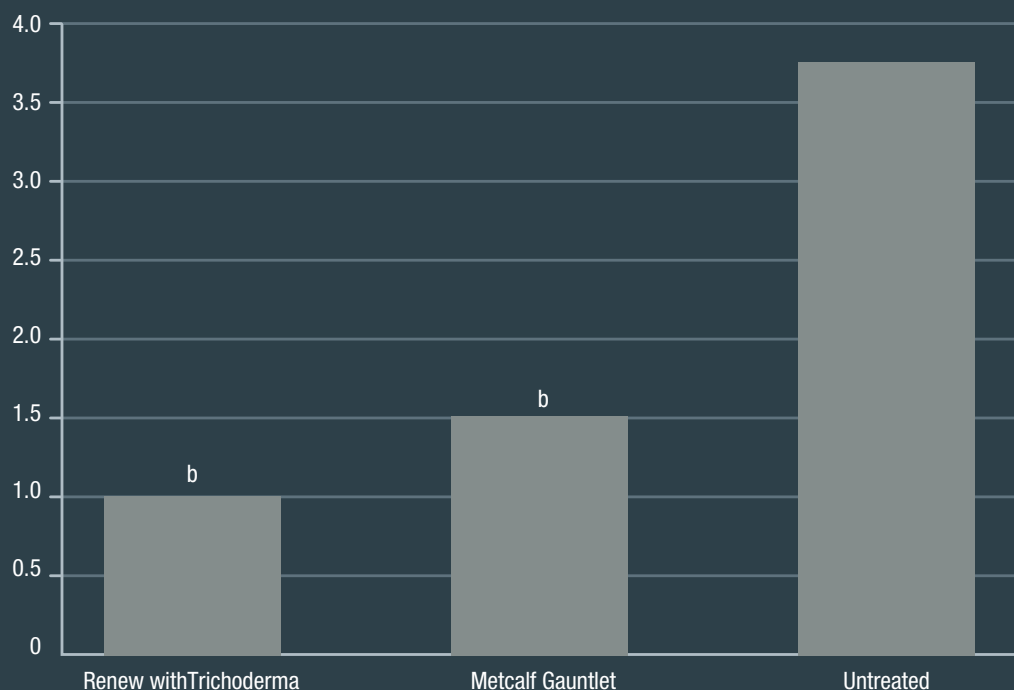

Small randomised complete block experiment at Wesley Vale, North-West Tasmania.

Application of Renew biological fertilizer with Trichoderma lead to a 70% reduction in onion white rot.

Renew biological fertilizer with Trichoderma also supplies:

- ✓ Macro and micronutrients
- ✓ Soil organic matter and carbon
- ✓ Water infiltration and moisture
- ✓ Improved soil structure and potential rooting depth

Percentage of onion white rot at harvest (Isd = 1.6<sup>1</sup>)

<sup>1</sup> Data analysed using Single Factor ANOVA in Microsoft® Office Excel® 2007.
